

## **Microsoft Azure Cloud Migration Assessment**

Aligned to Microsoft's Cloud Adoption Framework, Cloudxchange.io will ensure your Azure migration is well-considered, seamless, and cost effective.

A Microsoft Gold Partner in both Cloud Platform and Cloud Productivity, Cloudxchange.io Microsoft Azure services span three distinct phases:

1. Azure Migration Assessment
2. Azure Migration Services
3. Azure Management Services

Delivered by qualified, experienced Azure migration experts and based on industry best practices, Cloudxchange.io Azure Migration Assessment includes:

**Discovery:** During the discovery phase, we understand and document your existing infrastructure, applications and overall business objectives driving the move to Azure

**Planning:** During the planning phase, we build a proposal including which applications to migrate, how to migrate each application, and when each migration should take place.

**Evaluation:** The evaluation phase focuses on building the business case for your Microsoft Azure migration - ready for review and sign-off by the final decision makers.

Cloudxchange.io Azure Migration Assessment will help your organization clearly answer the following questions:

1. Of the applications and infrastructure, you are currently running; which should be migrated, modernized, retired, replaced, or maintained on-premises?
2. What risks are associated with an Azure migration, and how long the migration will take?
3. What the return on your investment for migration, based on current running costs, post-migration running costs, and the cost of migration itself, will be?
4. What additional benefits the cloud migration will bring to your business?

Our services include:

**Migration assessment.** Using industry best practices and tools, Cloudxchange.io team of Azure experts offer peace of mind with our comprehensive migration assessment.

**Business plan.** Our team can help with important information for your Azure migration business plan for CXO or board approval.

**Governance.** Our best practices spanning security, connectivity and policies prior to migration ensure that your organization is on the right foot from the outset.

**Proof of concept.** Minimize risk with an Azure POC to get visibility on unexpected discoveries impacting the migration schedule during the execution phase.

**Cost optimization and ROI.** Cloudxchange.io can help with initial guidance to managing, optimizing, controlling, and forecasting your Azure spend and workloads.

**Security and compliance.** Cloudxchange.io will help guide you on how to best protect your applications or servers built on or utilizing the Microsoft Azure platform.

**Network design.** We will ensure your network is up to scratch across virtual networks, subnets, peering, network security groups, routes, connectivity to on-premises networks, and use of virtual appliances.

**Storage and backup design.** We will ensure your solution delivers on capacity, IOPS, data throughput, high availability, and disaster recovery.

**Service Desk.** Available 24 x 7, 365 days a year, Cloudxchange.io based team is available to help with your Microsoft Azure support.
